

ProtoDUNE HD + VD — Wire-Cell 3-D Imaging & Deghosting

one tomographic pipeline: fired U/V/W strips coincide → blobs (+ ghosts) → charge-solve ⇌ deghost ladder → 3-D clusters

	anodes imaged	drift volumes	wire geometry	outputs
PD-HD	×4 APAs · both faces	2 horizontal drifts, cathode wall at x = 0 (±3.6 m)	wrapped U/V wires per APA	clusters-apa-apa{0-3}-ms-{active,masked}
PD-VD	×8 CRPs (bottom + top)	2 vertical drifts, top + bottom CRP planes	CRP strips (v6 U/V wire file, shield at ±339.91 cm)	clusters-apa-anode{0-7}-ms-{active,masked}
